

REGISTERING AN ANIMAL

1 Go to <https://infojersey.usjersey.com> and log in to your account.
Never logged into infoJersey before? Please see the tutorial that explains how to set-up an account.

2 Once logged into the website, hover over the 'Services' tab, then 'Registration' and select 'New Registration.'

3 This will bring you to the screen to input the animal's information.

A video tutorial for registering a Jersey is available on the USJersey YouTube Channel or at this link: <https://youtu.be/ecX71aZZjy8>.

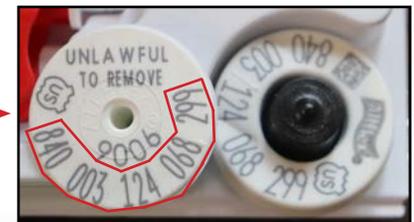

A National ID

The AJCA requires registered animals to have either two tamper-proof American ID tags or tattoos within the ear.

If you use JerseyTags or another official eartag for permanent ID, National ID is the 8 or 15-digit number printed on the tag. It will become the calf's registration number.

If you use tattoos, you will leave sections with yellow tags besides them blank, including National ID.

National ID

B Animal Name

Now is the fun part, picking a name! It is common for breeders to use a farm prefix, then the sire and then barn name. Keep in mind, you are limited to 32 characters and spaces. The animal must have the prefix of the breeder.

Do *not* include designations for polled or embryo transfer within this section. The system includes those for you when it's submitted.

Animal Name

C General Animal Information

<p>Sex</p> <p>FEMALE</p> <p>Twin Status</p> <p>NOT TWIN</p>	<p>Birth Date</p> <p><input type="text"/></p> <p>Service Type</p> <p>ARTIFICIAL INSEMINATION</p> <p>Poll Type</p> <p>HORNED</p>
---	--

This section covers the basic information for each animal. Ensure you are correctly entering the animal’s birthdate, sex, service type by which the animal was conceived (A.I., natural, embryo transfer (ET), ET split or clone), twin status and whether the animal is polled.

If an ET calf, remember the dam and sire must be parentage verified by genotyping.

D Herd Identification (Herd Management Number or Tattoos)

If you use tamper proof ear tags, the Herd Management Number is the large printed number you use to ID her in your herd. It can be any number you choose.

If using tattoos, you must enter the information in the ‘Tattoo’ section. The

<p>Herd Management Number (Right Ear)</p> <p><input type="text"/></p> <p>Right Tattoo</p> <p><input type="text"/></p>	<p>Herd Management Number (Left Ear)</p> <p><input type="text"/></p> <p>Left Tattoo</p> <p><input type="text"/></p>
---	---

tattoo must include *at least* one letter and one number in one or both ears.

E Sire Information

The sire’s information can either be put in as a registration number or his stud code delegation (NAAB code).

Sire

F Dam Information

Dam Breed JERSEY	Dam Country UNITED STATES	Dam ID <input type="text"/>
----------------------------	-------------------------------------	---------------------------------------

For the dam, you use her registration number, but not all 17 digits you see on her paper. Start with the first number following the zeros (0) in the registration number.

If the dam is registered with an 840 RFID, you will need to change the ‘Dam Country’ to ‘United States 840.’ To find this option, you will need to scroll down slightly below United States. Then enter all the information following the 840 code, most commonly starting with a three.

Dam Country

UNITED STATES (840)

If the dam is unregistered, you have options to change the breed code. If you do not fill in the ID box, the system defaults to Grade Jersey.

REGISTERING AN ANIMAL

G Breeder/Owner Information

The final step in the process is submitting the owner information. Enter the account number that belongs to the animal's first owner. The first owner is always the person who owns the dam at time of calving.

The breeder of the animal is the person who owned the dam at time of conception of the animal being registered.

Ownership Information

First Owner Customer Number

H Optional Information

Optional information can be entered at the end of the application. Previous ID could be the orange metal clip tags. Electronic ID would be an 840 RFID Tag placed in the ear.

Previous ID

Electronic ID

Service Date

Date of Death

4 Completing the registration.

Once you are finished and all the required boxes are filled in, (1) select 'Continue' to look over the application to verify all spellings and dates are correct.

Once you are sure all items are correct, (2) hit 'Complete.' You will then be taken to the final page. (3) This page will give you the animal's registration number which you should write down and save until you have the official paper.

The certificate will be printed the following business day and mailed.
